Article: 550671 - T-shirt s/s crew neck F-DRY

Item description:

Don't let sweaty, sticky conditions slow you down this summer – the fast drying, skin cooling performance of our F-DRY PRO crew neck short sleeve top works harder to keep you cool during sweltering summer workouts. Staying focused when your body is working at max capacity is all about effective sweat management: the F-DRY PRO uses a unique push-pull-effect to achieve next-level moisture regulation. By combining different fabric properties - Polypropylene on the inside, PES on the outside - this lightweight women's base layer rapidly wicks or 'pulls' moisture from the skin to the outer layer, resulting in faster drying times and cooler, dryer skin. Meanwhile, ODLO's advanced antibacterial Effect technology works hard to eliminate sweaty odours, helping you to stay feeling fresh, clean and confident while you train. Add 50+ UV protection to the mix, and you've got the perfect top for raising your game when others are losing their cool.

We hereby declare that above mentioned product has been produced in accordance with the following regulations and directives
